

METTA LEE

Systems Thinker · Operations Strategy · Analytics

Singapore · mettaleecixin@gmail.com · [linkedin.com/in/leemetta](https://www.linkedin.com/in/leemetta)

Systems thinker with 9 years managing complex operational ecosystems — campuses, government estates, heritage portfolios — and a track record of finding the real constraint behind the visible symptom. Certified Facilities Management Expert (CFME Tier 4) with a Business Analytics foundation, now applying structured problem-solving, incentive design and data analysis to strategy and business operations problems.

FEATURED STRATEGY WORK

SEA Pickup Adoption Strategy — Shopee (Work Simulation)

Jun 2026

Beachhead strategy to double offline-pickup adoption in Singapore and scale the playbook to Southeast Asia

- Diagnosed why only ~10% of SG checkouts choose pickup using a MECE driver tree (Awareness · Motivation · Access · Experience); **disproved the consensus supply-side hypothesis** — SG's Pick Network already offers 1,000+ 24/7 lockers within 250m of every HDB block yet runs at ~13% utilisation — redirecting the entire budget from infrastructure to demand.
- Designed a 4-pillar demand-side strategy (partner-funded rewards, youth-hub siting, social-led demand creation, core experience fixes); scored pillars on weighted criteria and **allocated US\$10M over 5 years by priority**, sequencing fast levers first.
- Identified that the existing system **punished the target behaviour** (3-day deadlines, 2-strike blacklists) and redesigned incentives around it; set a 10% → 20% adoption target worth **US\$25–40M/year per 10-point shift** at SEA scale, with a campus pilot, A/B measurement and scale path to ID/TH/PH/VN.

EXPERIENCE

Zone Manager — Savills Singapore

Oct 2024 – 2026

Integrated facilities management term contract, Republic Polytechnic — 6-building campus zone

- Managed a 6-building campus zone that included all three specialist operator clusters (food court, residential facility, childcare centre) — the only Zone Manager on the contract covering all three.
- Analysed CMMS fault-trend data (Property Cube, FacilityBot) to generate zone performance insight; supported the campus-wide Property Cube rollout and **set the data-entry standards** that keep reporting consistent.
- Audited contractor quotations line-by-line against the Schedule of Rates, **catching measurement errors and rate discrepancies before approval**; supported the food-court tender from documentation through award and managed the tenancy transition end-to-end.
- Owned zone-wide H&S and QEHS ISO compliance — risk assessments, incident investigations and corrective-action loops.

Leasing Executive — Savills Singapore

Jul 2022 – Sep 2024

Arts tenancy portfolio managed on behalf of a government authority

- Ran the full tenancy system — agreements, statutory compliance, invoicing, arrears follow-up and renewals — as the single interface between the Authority and its arts tenants.
- Built annual renewal work plans with proactive reminders and committee coordination, **converting reactive chasing into a predictable renewal pipeline**.

Facilities Manager — C&W Services

May 2019 – Jul 2021

6 government Social Security Offices + 3 temporary sites; 5 main contractors

- Orchestrated multi-vendor FM delivery with monthly KPI reporting to government stakeholders across compliance and service quality.
- **Led the full COVID-19 operational response**: stood up 3 temporary workstations for 149 additional staff and 2 tentage sites, coordinated disinfection across all locations and supported contact-tracing reporting — without disrupting core operations.

Property Officer — C&W Services

May 2018 – May 2019

Cluster of 7 welfare homes (MSF)

- **Led the cluster-wide rollout of a new CMMS (360Facility)** — implementation coordination, colleague coaching and onboarding documentation; managed procurement and budget monitoring on JDE and Workday.

Deputy Estate Manager

Feb 2017 – May 2018

254-property heritage (Black & White) estate cluster

- Ran day-to-day estate operations — tenancy, vendors, marketing, FM — and **grew Seletar occupancy from 68.5% to 74.6% in one year** by fixing the marketing, engagement and vacancy-management loop rather than discounting rents.

Earlier: Real Estate Salesperson, ERA (2021–22) · Property journalism internship, The Edge Property (2016)

EDUCATION & CERTIFICATIONS

- **MSc Built Environment** — Singapore University of Social Sciences (SUSS), expected Dec 2027
- **Graduate Diploma in Facilities Management** — SUSS, 2026
- **BSc Business Analytics** — SUSS, 2024 (completed part-time alongside full-time roles)
- **CFME Tier 4 — Certified Facilities Management Expert** — SIFMA (highest tier, awarded via comprehensive evaluation)
- **Specialist Diploma, Sustainable Facilities Management** — Ngee Ann Polytechnic, 2018 · **Diploma, Real Estate Business** — Ngee Ann Polytechnic, 2015

SKILLS & TOOLS

- **Problem structuring:** MECE issue trees, hypothesis testing, weighted prioritisation, incentive design
- **Data & analysis:** CMMS analytics (Property Cube, FacilityBot, 360Facility), fault-trend analysis, KPI design & reporting, Excel
- **Commercial:** contract & SOR analysis, tender support, budget management (JDE, Workday), vendor negotiation
- **Delivery:** systems rollout & change management, multi-stakeholder coordination (government, operators, contractors), QEHS/ISO & WSH compliance
